

1 ABSTRACT OF THE DISCLOSURE

2
3 A method, program and system to verify that an electronic
4 message was sent to the intended recipient and to provide
5 the originator of the electronic message with an
6 independent confirmation that verifies the time and date
7 that the electronic message was sent and the time and date
8 that it was delivered. A secondary purpose is to verify the
9 identity of an intended electronic mail recipient prior to
10 the intended recipient's receipt of the electronic mail.
11 The inventive device includes a central processing unit to
12 facilitate the receipt and delivery and confirmation of
13 electronic mail. The processing unit tracks incoming and
14 outgoing electronic messages; tracks customer accounts and
15 identities; archives all relevant information for future
16 use and/or reference; and disseminates the foregoing data
17 to regional/local servers and clients as necessary.
